10. Top 3 Things To Do Next

1. Cut or audit advertising and subscription spend

Advertisements (₹1,73,645) and Subscriptions (₹1,43,906) together consumed ₹3,17,551 — 52% of all operating expenses and 24% of total revenue. The data shows no sales uplift during or after high-spend months. Require each advertising line item to be tagged with a channel, and compare month-by-month ad spend against transaction volume to identify what is actually driving sales.

2. Investigate Q4 over-purchasing before it repeats

In Q4 2025 (Oct–Dec) the business spent ₹4,27,372 against revenue of only ₹2,55,201 — a quarterly loss of ₹1,72,171. The top 3 suppliers (DC Books ₹1,72,274; Current Books ₹1,43,595; Aman Book Stall ₹1,40,365) account for 47% of all stock spend. Before the next festive season, conduct a sell-through analysis by supplier to avoid over-ordering slow-moving titles.

3. Urgently review the February 2026 cancellations

13 of the year's 16 cancellations occurred in February 2026 alone (normal months see 0–1). Determine whether this represents a bulk order that fell through, a data-entry correction exercise, or a customer service issue — as uncollected revenue from cancelled invoices could be material.
